### Mothers' Experiences of EMDR Treatment for their Traumatic Childbirth

In order to help clinicians provide better care to mothers who have experienced a traumatic childbirth Cheryl Beck (Professor at the University of Connecticut) and Sue Watson (Chairperson of TABS) are now conducting a research study on this topic. Women who have had eye movement desensitization reprocessing (EMDR) treatment are invited to participate in this research study. Participants need to be 18 years of age or older and be able to read and write English.

Just like Professor Beck's previous studies on birth trauma and posttraumatic stress disorder (PTSD) after childbirth, this study will be conducted over the Internet. Mothers will be asked to describe their experiences with their EMDR treatment.

If you are interested in participating in this research or wish to find out more about the study, please contact Professor Beck directly at the University of Connecticut. Her email address is [Cheryl.beck@uconn.edu](mailto:Cheryl.beck@uconn.edu)
